Hey Nancy and Larry, we just got our score back and we went up another 37 points. Our API is now 760. The state asked us for a 10 point growth and we gave them 37! We are out of program improvement (almost sure). Our math went from 31 % two years ago to 64% this year. The federal target for math was 47%. We beat it by almost 20%. As you can tell, I'm so excited!

Jesse

Larry's Note: This same "highly challenged" school that had never made AYP made it for the second consecutive year and exited Program Improvement by incorporating Larry Bell's strategies.
