Hello Larry,

My name is Viola Sims, Principal of Mariana Elementary in Apple Valley, CA. Our API score increased by 47 points this year. Our teachers faithfully use the Larry Bell Unraavel Strategies for a full 2 years since we attended your Conference at Apple Valley High School. We met 20 out of 21 of the AYO. The White subgroup in Math did not make enough growth to exit Program Improvement; all other subgroups grew tremendously. Is there any way we can get help with a field trip to Knott's Berry Farm for our Proficient and Advanced Students which number about 200 students? I remember you mentioned you might be able to help with a field trip if significant growth was experienced through using your proven Larry Bell Strategies. If not, I want to sincerely thank you for your teachings!

Viola Sims, Princpal Mariana Elementary
